

Trust Based Relational Intervention (TBRI)

Trust –Based Relational Intervention is a holistic approach that is multi-disciplinary, flexible, attachment-centered, and challenging. It is a trauma-informed intervention that is specifically designed for children who come from “hard places” of maltreatment, abuse, neglect, violence, or multiple traumatic experiences. The principles apply to all children. TBRI consists of three sets of harmonious principles: connecting, empowering, and correcting principles.

1

Participants & Prerequisites

Audience:

*** Administrators**
