Student Intervention Report

Objective: To use an advanced search tool that runs a list of interventions by district, high school, middle school or elementary schools.

Considerations for Usage

1. Administrators have the ability to run reports for the entire campus by specific grade levels.

2. Administrators are able to get a list of every student who has had any of the following "Intervention Type": Academic, Attendance, Behavior, Speech, Oral Language, AIP, ILP, Service Tracking, and Roster Based Programs for any grade level.

3. An administrator may run a report on students with a specific filter for an intervention and then be able to hot link to the student's profile page and view the student's interventions.

4. An administrator may want to run a report to create a list of every student who has had an AIP in the previous school year.

5. An administrator may pull up a list of students with their hot links who have had a Behavior Intervention this school year or last school year.
